

## AdPower Running Test Method

Oct 2014

Tomizawa & Co., Ltd

### Test Method

[step1] Inject fuel to full and set Trip Meter to “0”

[step2] Set Trip Meter to “0” after oiling it to full with fuel after having operated constant distance, and recorded the mileage and quantity of fuel lubrication in a diary.

[step3] Carry out step1, step2 repeatedly and the manager carried out present condition report that is based on a vehicle mileage management diary after progressing for one week.

\*If you don't have the actual mileage data, please test without AdPower at first. Then, please go to above step1.

### Measuring Procedure

- ❖ 1: Full tank measuring 2: Gas mileage measuring system within the car  
Comparison with the accuracy: Full tank measuring is best.
- ❖ Point of view  
It's the most accurate measuring method. Most of the public agency test is used measuring cylinder for full tank measuring.
- ❖ Why the most accurate?  
The measuring method is quite simple so the error is very few.
