

Q&A

(About the product)

Q: How long does it expiration date?

A: Two years after installed. We recommend you to replace new one after two years.

Q: Why AdPower can work out the saving fuel, emission cuts, more powerful your car by only attached on the air duct?

A: AdPower works well to the promotion of oxidation-reduction and fuel and air. POWER PLUS emits the stable electron and neutralizes instantly the problem positive ions. It includes the ceramic with a combination of 700 species and contributes to the combustion promotion which fine-tunes any heat and energy.

(About after installation)

Q: After installation, I feel the lighter accelerator.

A: The faster response of the engine and the same engine power with smaller pressure to the accelerator means the first sign of the effect. Hence it can make the saving fuel.

Q: I feel the quieter the engine than before AdPower, why?

A: The engine is improved the combustion of the engine by AdPower so you may feel the quieter.

Q: What does AdPower give the influence to the engine?

A: The inside engine is improved the conditions by supplying the clean oxygen. From the patented technology, you can expect the long-life of your engine.

(About the saving fuel)

Q: Does AdPower make the saving fuel after installation immediately?

A: Most of cases can work out immediately from our actual performance but some of the cases can work out after 1,000 to 3,000km running.

Q: How do I calibrate the mileage?

A: Recently, the gas mileage measuring system is prepared but we

recommend you to calibrate from 'full tank measuring' from our many test data. (we prepare the measuring method manual)

Q: What's the percentage of the saving gas by AdPower?

A: It depends on the conditions of the automobile, the driving and weather, you can expect five to twenty percent from the over fifteen years historical performances of AdPower.
